Cam Viewer Plus Lite

The PLANET Cam Viewer Plus Lite is a central management software for multi-camera video surveillance application. It enables users to easily create surveillance systems for large area coverage using multiple cameras and be controlled from a single PC to protect your property and life.
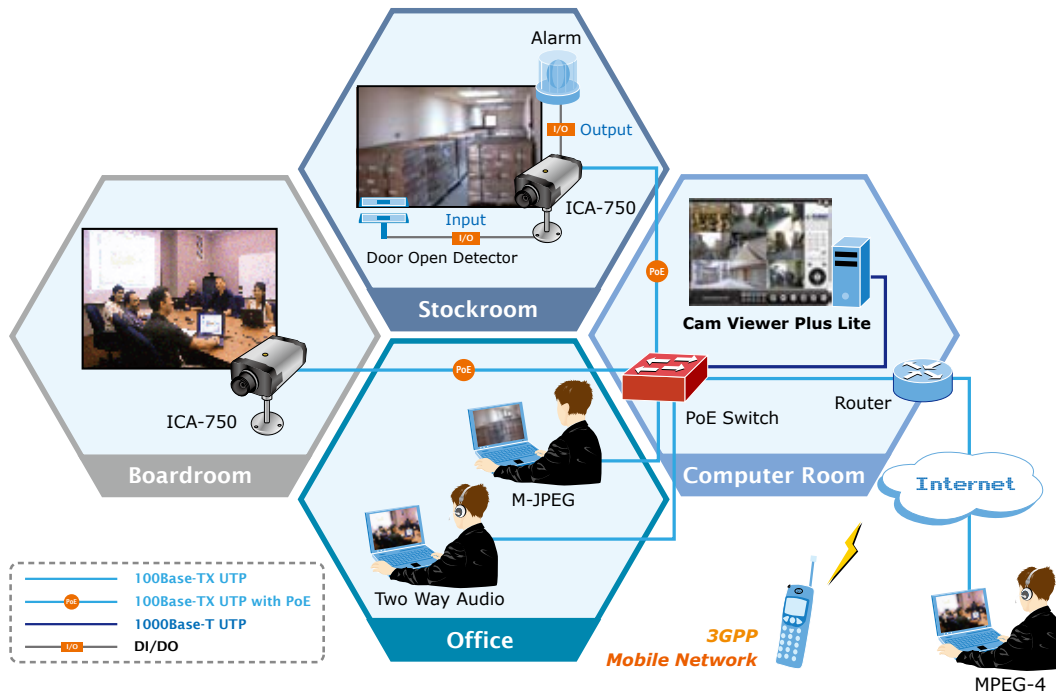

Cam Viewer Plus Lite helps users to monitor and record images / videos from multiple cameras simultaneously by using a single PC and able to operate up to 64 channels. Each camera has its own settings for recording, event, trigger, codec, resolution and quality. You have full control and flexibility to customize your IP surveillance products and system from a single workstation.

The recording video can be saved in the PC hard disk or network storage such NAS and FTP. All the videos in the recording system are sorted by time. It supports cycle recording to rewrite the oldest video in the system and to make the recording system work more efficiently. It also supports cutting function that users can set the start and end time point to export the video without additional editing software.
