Cam Viewer Plus Professional

An excellent solution to advanced surveillance needs, the PLANET Cam Viewer Plus Pro can manage different IP cameras at the same time in just one central management interface. Providing a state-of-the-art IP surveillance system, this software supports the most of PLANET IP cameras and video servers, with the equipments connected directly to LAN or any TCP/IP network such as the Internet. Digital recording of the IP surveillance system can be saved directly in the hard drive(s) of the PC.

Cam Viewer Plus Pro helps users to monitor and record images / videos from multiple cameras simultaneously by using a single PC and able to operate up to 64 channels. Each camera has its own settings for recording, event, trigger, codec, resolution and quality. All the videos in the recording system are sorted by time. It supports cycle recording to rewrite the oldest video in the system and make the recording system work more efficiently. It also supports more advanced functions like E-MAP, Object Counting, Multi-Function playback, Instant Response, Smart Search and Multiple Monitor for thorough surveillance management. You have full control and flexibility to customize your IP surveillance products and system from a single workstation.

Not only being a single management software, but Cam Viewer Plus Pro can co-work with other software to build up a complete surveillance system. For example, a Central Management System allows user to handle the entire surveillance system in one console. An Intelligent Video System can indentify object and monitoring environment with more security options to enhance the security level. And a Streaming Server Center can broadcast the video streaming to public area for reducing the remote login loading from the central server. With those specify software, you can set up a real surveillance management system, but not just a monitoring and report system.

KEY FEATURES

- Multiple cameras support up to 4 / 9 / 16 / 25 / 36 / 49 / 64 cameras

- Multi-language support

- Multiple monitor support for viewing live video and playback simultaneously

- Live video available from multiple remote Cam Viewer Plus servers

- Up to 16 channels multi-view playback simultaneously
